Human Centered Automation
for Frontline Operators

Design efficient, intelligent applications across your supply chain to increase your frontline capacity.

WHAT WE DO

Ox offers a frontline operations system for retail & supply chain execution that utilizes software automation, wearable technology & real-time intelligence to deliver operational excellence.

By leveraging artificial intelligence & machine learning, the Ox software allows operators to make the best decision every time via directed work.

| Real-Time **Routing** | Pallet **Building** | Order **Picking** | Inventory **Control** | Workload **Visibility** | Performance **Analytics** |

OUR RESULTS

Operators are empowered with directed work, resulting in one-best way & increased employee satisfaction.

The benefits of automation should directly impact the worker.

↑ **20%** efficiency increase

↑ **80%** reduction in training time

↑ **100%** operational visibility

Ox provides app-based workflows & operational intelligence to increase process efficiency & accuracy.

STEP 1 DEFINE OPERATIONS

Operator
Where do I need to go for my next task?

Workflow
How do I validate my work is accurate?

Process
What work do I need to complete next?

STEP 2 INSTALL HARDWARE & SOFTWARE

HANDS−FREE HARDWARE
ANDROID OR IOS

Heads-up **Displays**

Smart **Watches**

Mobile **Devices**

Ring **Scanners**

STEP 3 DIRECT EXECUTION

Experience
- Hands-Free, Voice + Vision
- Configurable Workflows
- Intuitive User Interface

Intelligence
- Automated Order Allocation
- Directed Work
- Sequencing/Order Batching

Visibility
- Real-Time Data Visibility
- Track Workloads, Operators & Productivity
- Performance Analytics

WHY OPERATORS LOVE OX

Real employee feedback from warehouse operators on the front line.

"It's fantastic! My job is faster, easier. Switching back to the gun is slow, frustrating now. Ox is difficult for the first day but now it's pick and go. You don't think about how long it is taking because it makes it easier for me to pick."
–Shad

"The accessibility for the teammates, hands free usage for stacking, driving, etc. No losing or dropping the gun. No connection issues compared to current RF units. They don't seem to lose connection with the network hubs. The connectivity issues are such a problem for RF users."
–Hunter

"It makes things easier. Ox saves a lot of time by helping tell you where to go & what to get."
–Peterson
