Our Technologies

Our solutions leverage innovations in mobile computers, wireless networking, print and more. Our hardware and software technologies are sourced from our ecosystem of trusted partners.

Hardware

Our end-to-end AIDC technology solutions are powered by best-of-breed hardware innovations from innovative manufacturers such as Zebra Technologies, Honeywell, Datalogic and many more.

Wireless Networking

Stay connected and avoid signal dropouts with enterprise-grade wireless networking technology.

Mobile Computers

Renovotec is your one-stop-shop for the latest innovations in mobile computing and handheld technology.

Tablets

Rugged and consumer-grade tablets, built for performance in any industry setting.

Barcode Scanners

Utilise the very best innovations in data capture and barcode scanning hardware.

Wearables

Wearable technologies reduce the times it takes to complete key tasks and processes.

Displays & Touchscreens

Enhance worker productivity and the customer experience with interactive displays.

ePOS

Create a frictionless and seamless customer experience during the point of sale.

Printers & Consumables

Leverage the latest innovations in desktop, mobile and industrial printer hardware.

ATEX Devices

Intrinsically safe mobile technology for high performance in extreme conditions.

Vehicle Mounts

Empower your forklift operators and vehicle drivers with enhanced mobile computing.

Kiosks

Upgrading the customer experience with dynamic interactive kiosk solutions.

Voice-Directed Technology

Experience increased productivity and improved efficiencies with the power of voice.

Robotics

Embrace the automation benefits of autonomous mobile robots and machine vision.

RFID

Enhanced enterprise asset management and tracking with RFID technologies.

Accessories

Add-ons that enhance the longevity and ruggedness of your hardware technology.

Software

Our internal development teams are ready to enhance your operations with applications that seamlessly connect your systems, improve task scheduling, implement voice integration, manage customer journeys and more.
