The Perfect Order Process

Technology for Smarter Fulfillment

techSHIP

Take the Hassle Out of Small Parcel and LTL Shipping

techSHIP is a multi-carrier shipping solution that automates and takes the hassle out of small parcel and LTL shipping. Easily get more volume out the door correctly - without additional labor - and make money on your shipping, too.

Benefits For You

Good-bye, manual processes.

- Up to 75% Labor Reduction.
- Up to 43% Savings in Shipping Costs.
- Up to 256% Increase in Shipments Per Hour.
- Handle three times the volume with the same number of pack stations.
- Easy to use. Easy to train on. Can train a team in under 30 min.
- Make more money shipping than with your Warehouse Pick Fees

Ask us for proof – we'd be happy to provide it.

"
"From order sourced to shipped product, we went from 1 minute 46 seconds down to 14 seconds with techSHIP."

Adam, **GIANT TIGER**

A depth of integration you didn't know was possible.

Achieve the ultimate of being fully integrated

More than just your WMS. Integrate with robots, conveyors, label scanners, bagging machines, scales, dimensioning systems...anything you need integrated to achieve labor savings and faster order processing.

Advanced Order Management Rules (OMR)

Flexibility to create your own OMR using advanced logic without hard coding. Easily create "if- then" rules that are automatically applied to the shipment. For example,

| IF order = $1,000 | > | THEN Apply Insurance Flag |
| IF order > 50lbs | > | THEN Ship UPS |

Handle more volume with no additional labor

techSHIP integrates directly with your WMS to automate the entire shipping process. techSHIP will automatically pull **all required data from the WMS when a label is generated** to eliminate manual data entry and enable you to handle more volume with the same number of people.

This data includes order detail, weight & dimensions, customs details, dangerous goods, etc.

More than just labels. Get all documentation you need with every carrier.

Anyone can print a label, but with techSHIP, everything is automatically created, from **Commercial Invoices** to **Dangerous Goods documentation,** to **electronic/paper courier manifests,** to **Section 321 ACE Manifest** for shipping into the USA and much more. Automatically get the documentation you need when you need it.

Feature Overview

- ☑ Ability to mark-up carrier rates ($ added to your pocket)
- ☑ The most customizable system
- ☑ Write your own order management rules (OMR) *
- ☑ Unlimited accounts and users with no additional charges
- ☑ Scalable solution to grow with your company
- ☑ Order cartonization to auto-select boxes and auto-pack your orders

*refer to Page 6, a depth of integration
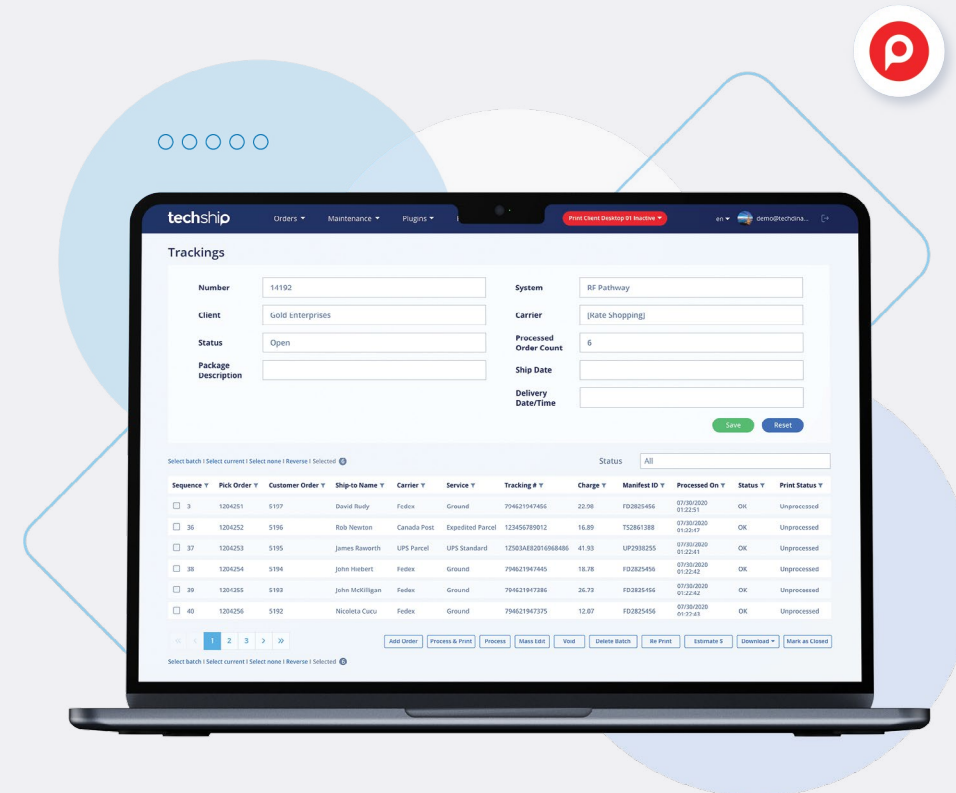

Worried you might have to change your process? Don't.

Each business picks and processes differently. We get it. As a worldwide product, techSHIP is tailored to your processes.

10x shipping with the same number of people

fully integrates with any system on planet earth

next generation rate shopping capabilities

techTRACK

One More Reason Why Your Customers Will Stay With You

Full visibility of shipment statuses for your warehouse and customers.

Plus, **real time and historical shipping analytics** to use to your advantage.

Feature Overview

- ☑ Integrated with techSHIP, any customer system, or file-format, **so your customers get the visibility they want**
- ☑ View real-time shipment statuses from one dashboard **so your customers can quickly get the information they need**
- ☑ View shipment events across all customers, including POD images and attempted delivery, **so you can see where balls were dropped along the shipment process and who dropped them**
- ☑ Shipment data automatically flows to one single tracking portal **so it's easy for your customers to use**

- ☑ For bigger customers that have their own systems, they can extract the information they want and post into their system **so you can always keep them happy**
- ☑ Run reports based on customer, carrier, country, and date range **so you can quickly identify which carriers aren't up to snuff– and which ones are**
- ☑ Identify late/on-time deliveries, late/on-time induction, and shipping trends by date **so you can see which carriers are outperforming the others and negotiate better rates with the best carriers**

A win for your warehouse

meet your customers' visibility demands

know where problems occurred in the shipment process

**negotiate better carrier** rates

tech**AUDIT**

Stop spending hours and even days, manually reconciling your freight invoices

Identify your freight invoice discrepancies in seconds with techAUDIT.

techAUDIT is your next-generation carrier auditing tool designed to **reduce accounting time by 50% or more.** techAUDIT **identifies invoice discrepancies within seconds** so that your **Accounting team can audit your carrier bills from hours to minutes.**

techAUDIT captures the information recorded at the time of shipping and compares this data against your carrier invoices so you can easily spot discrepancies between what the carriers recorded initially and what they ultimately billed.

Paired with techTRACK and techSHIP, techAUDIT finds discrepancies in freight invoices within seconds. Now your accounting department can solely focus on reconciling those differences.

| reduce accounting time by 50% or more | identify invoice differences at the speed of sound | kick your shipping up a notch–or two |

Feature Overview

- See invoice discrepancies in seconds
- Quickly identify reoccurring overcharges to save money shipping and stop being overbilled.
- Never be overcharged again
- Add any carrier you want, anytime
- Reconcile freight bills at the speed of awesome
- Full integration with techTRACK and techOMS

Add any carrier you want, anytime.

We'll add any and all carriers you want at the time of your set up and any time later.
