

What is Conduit?

Conduit is an easy-to-use software system for your whole warehouse: dock scheduling, driver sign-in, and yard management. Choose the modules you need to start and add more as your business grows. Use all three together to experience the effortless magic of a connected warehouse.

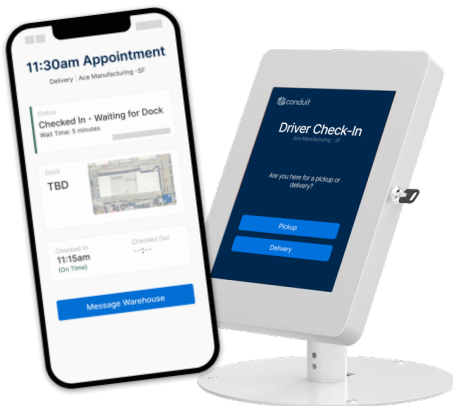

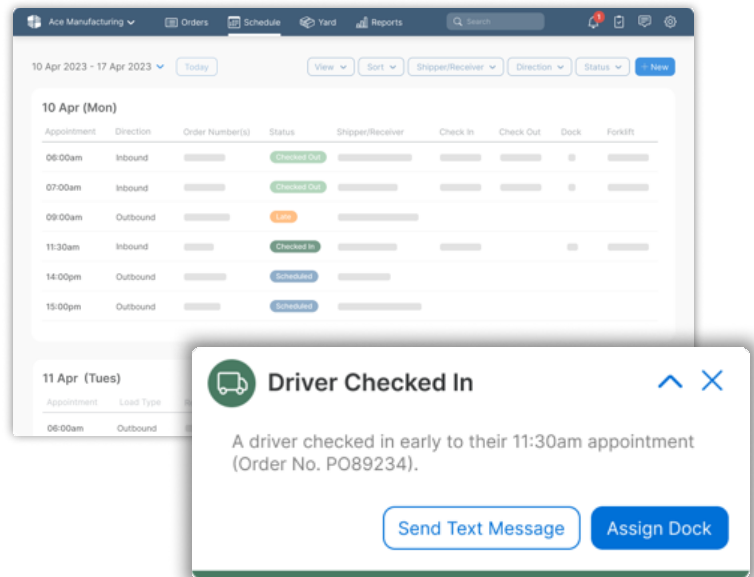

Some Benefits of Our Platform

Save 20+ Minutes of Labor Per Shipment

Carriers and vendors schedule appointments with your facility online, eliminating phone calls and emails. Drivers check in using a tablet or QR code instead of taking up a clerk's time.

Avoid \$1,000s in Chargebacks & Detention

Stop chargebacks with photo evidence and automatically notify whoever's responsible. Gather the information you need from drivers, carriers, and vendors to keep your operation secure and compliant.

Unlock Data-Driven Efficiency

Rich analytics make it easy to improve labor efficiency and warehouse capacity with smart staffing. Carriers or vendors routinely causing problems? Use Conduit's scorecards to hold them accountable to high performance.

Customer Success

“Conduit’s dock management opened up a full-time job.”

Teresa Nelson
General Manager **PS&L, Inc.**

Produce Services & Logistics is an intermodal freight forwarder that ships food to customers in Alaska and Hawaii. After a challenging peak season of yard congestion and inefficiency, they became a Conduit customer to keep it from happening again. Conduit replaced PS&L’s appointment spreadsheets within two days and quickly cleared their yard congestion. Based on Conduit data, PS&L adjusted staffing to **save 20+ hours of overtime per week.**

“Conduit totally reinvented how our team operates.”

Stephanie Wallis
Logistics Manager **encore glass**

Encore Glass is a packaging distributor for Northern California wineries. They became a Conduit customer to replace their outdated dock appointment spreadsheet that was causing a “free-for-all” of stress, inefficiency, and miscommunication. With Conduit, anyone at Encore can now see what’s coming, share updates with customers, and collaborate to prevent last-minute disruptions. Encore uses Conduit scorecards to ensure they get the best possible service from their vendors and carriers.
