FreightPOP

Enterprise Shipping Software

WHAT IS FREIGHTPOP?

5-in-1 Solution

FreightPOP facilitates operational planning, multimode shipping, invoice auditing, robust reporting, along with real time visibility for both inbound and outbound shipments. Our homegrown APIs, which includes access to over 300 LTL and truckload freight carriers, provides unmatched integration capabilities without passing on costly third party expenses to customers. This allows us to solve for unique and complex shipping requirements, ensuring efficiency, reliability, and scalability for a business' operations.

Who We Work With

Manufacturers
Distributors
Retailers
eCommerce
Food & Beverage

THE RESULTS

Business Impact

Time Saved:
Reduce manual data entry by up to 90%.

Increased Efficiency:
Cut shipping processing time by 50%.

Lower Costs:
Achieve cost savings of up to 35% on shipping.
